Anti-GAD67/65

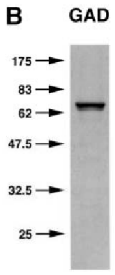
(glutamic acid decarboxylase-67/65)

Code Number : GAD-Rb-Af260

Size : 20 μg (affinity-purified with antigen polypeptide)

Formulation : Liquid ; 200 μg/ml in PBS with 0.05% NaN_3.

Storage : Store at 4 ˚C. The antibody can be stored at 4 ˚C. The antibody can be also aliquotted and stored at -80 ˚C for long-term storage. Avoid repeated freeze-thawing. Non-hazardrous. No MSDS required.



Species : rabbit, polyclonal

Antigen : mouse GAD67, 268-593 aa (A28072)

Specificity : mouse (others not tested)
This was raised against GAD67.
Due to its sequence similarity, it also reacts weakly to GAD65. Therefore, immunoblot detects doublet bands at 65 and 67 kDa. This selectively stains GABAergic interneurons, particularly in their terminals.

Applications : In general, affinity-purified antibody is used at around 1 microgram/ml for immunoblot and immunohistochemistry. The most appropriate concentration should be determined by users, because it depends on contents in given cells, tissues and organs.

Research Use : For research use only, not for use in diagnostic procedures.
